What To Do If You Are In A Car Accident, A Guide.

You have just been in a car accident, what should you do? What information do you need? This brochure is meant to be a practical guide to the minimum information you should try to obtain.

What Information Should I Get At The Scene?

Keep this brochure in your glove compartment. At the scene, first determine if you are physically able to gather information. If you are unable to think clearly or are in a great deal of pain, you need to summon medical help. If you are experiencing the above symptoms do not try to drive away from the scene until you have been medically assessed. If you are feeling well enough to exchange information you should have in your car your insurance and registration cards. Try to keep up to date insurance information in the car. If you physically cannot get the information suggested on this form have a passenger do it or call a relative or friend to come to the scene.
